

## COVID-19

Being that the situation with the COVID-19 pandemic is changeable, I will still continue to offer my services as allowed. Homes should be vacated of all occupants at the time of shoots. A best case scenario would be an unoccupied home for 4-8 hours before a shoot but I realize that this provides some hardships and can be discussed. Listed below are a few guidelines to follow and precautions I will take while photographing your home.

- Including the residents, other individuals such as landscapers, construction workers, cleaning crews etc. should not be present at the time of the photo shoot
- To avoid touching things as much as possible, if the home is furnished/staged everything should be in place and ready to go before the shoot
- I will do my part by wearing a mask and gloves if needed
- Please provide me with your contractor's box code or make other arrangements for entry

Thank you for taking the time to best follow these guidelines. Please let me know if you have any questions.

I look forward to working with you!

James
